```

The diagram illustrates the etymology of the word 'professor'. It shows a flow from Latin 'profiteri' (with a 'LATIN' label) to 'profess-' (declared publicly, with a 'LATIN' label), which then leads to 'professor' (with a 'LATIN' label). Additionally, it shows 'profess' (with an 'ENGLISH' label) leading to 'professor' (late Middle English). Arrows indicate the direction of the etymological path.

Cloud Printing

- With Cloud Printing, one can print from his iPad, iPhone, Smart Phone, Tablet or any PC which is not connected to printer
- **Steps**
 - If you have cloud ready printer, just connect your printer to Web
 - From Chrome log on to Google Cloud Printing
 - Add your printer
 - You can even share this printer to others

Cloud Printing

- In your Smartphone, iPad, Tablet, etc, add Cloud Printing App
- Map your printer which you connected to Web on your Cloud Printing App
- Whenever you want to take any print, just give print command from your device
- Cloud Printing App will ask you to select Printer and will then Print

Cloud Printing

- In case, your printer is not Cloud Ready (i. e. when you have classic printer)
- Go to
- Chrome – Settings – Show Advanced Settings – Google Cloud Print – Add Printer
- Once you add Printer, you can manage / share printer with friends / family members
- Rest of the steps are as given in earlier two slides

Chrome Setting

- Log on to your desktop / laptop which is connected to normal printer
- Go to Chrome and click on
- From drop down menu click on Settings

Chrome Advanced Settings

- In Setting tab, go to bottom
- Click on “Show advanced settings”

The screenshot shows the Chrome Settings interface. At the top, it says 'Settings' with a 'google.com' link and a 'change' link. Below that is a toggle for 'Always show the bookmarks bar'. The 'Search' section includes a description 'Set which search engine is used when searching from the omnibox.' and a dropdown menu currently set to 'Google', with a 'Manage search engines...' button. The 'Users' section states 'You are currently the only Google Chrome user.' and has buttons for 'Add new user...', 'Delete this user', and 'Import bookmarks and settings...'. The 'Default browser' section says 'The default browser is currently Google Chrome.' At the bottom, there is a blue link 'Show advanced settings...' which is highlighted by a red arrow pointing from the text 'Show advanced settings...' in the list on the left.

Advanced Search. . Option - III

Either/or

Google normally searches for pages that contain all the words you type in the search box, but if you want pages that have one term or another (or both), use the OR operator -- or use the "|" symbol (pipe symbol) to save you a keystroke. [sweet | little | Girl]

Quotes

If you want to search for an exact phrase, use quotes. ["sweet little Girl"] will only find that exact phrase. [sweet "little Girl"] will find pages that contain the word sweet and the exact phrase "little Girl".

Advanced Search

- **Not**

If you don't want a term or phrase, use the "-" symbol. [-sweet little Girl] will return pages that contain "little" and "Girl" but that don't contain "sweet".

- **Similar terms**

Use the "~" symbol to return similar terms. [~sweet little Girl -sweet] will get you pages that contain "Cute little Girl" and "Darling little Girl" but not "sweet little Girl".

Advanced Search

- **Wildcard**

The "*" symbol is a wildcard. This is useful if you're trying to find the lyrics to a song, but can't remember the exact lyrics. [can't * me love lyrics] will return the Beatles song you're looking for. It's also useful for finding stuff only in certain domains, such as educational information: ["sweet little Girl" research *.edu].

Advanced Search

- **Definitions** - Use the "define:" operator to get a quick definition. [define: sweet] will give you a whole host of definitions from different sources, with links.
- **Movies** - Use the "movie:" operator to search for a movie title along with either a zip code or U.S. city and state to get a list of movie theatres in the area and show times.
- **Music** - The "music:" operator returns content related to music only

Advanced Search

- **Numrange**

This little-known feature searches for a range of numbers. For example, ["best books 2002..2007] will return lists of best books for each of the years from 2002 to 2007 (note the two periods between the two numbers).

- **Site-specific**

Use the "site:" operator to search only within a certain website. [site:sweetlittleGirl.com leo] will search for the term "leo" only within this blog.

Advanced Search. . . .

- **File types**

If you just want to search for .PDF files, or Word documents, or Excel spreadsheets, for example, use the "filetype:" operator.

- **Location of term**

By default, Google searches for your term throughout a web page. But if you just want it to search certain locations, you can use operators such as "inurl:", "intitle:", "intext:", and "inanchor:". Those search for a term only within the URL, the title, the body text, and the anchor text (the text used to describe a link).

Advanced Search. . . .

- **Cached pages**

Looking for a version of a page the Google stores on its own servers? This can help with outdated or update pages. Use the "cached:" operator.

- **Answer to life, the universe, and everything**

Search for that phrase, in lower case, and [Google will give you the answer.](#)

The screenshot illustrates the Google Drive interface. On the left, a local file explorer shows a directory structure under 'Sanjay > Google Drive'. On the right, the Google Drive web interface shows a list of files and folders. Red boxes highlight the breadcrumb 'Sanjay > Google Drive' and the URL 'https://drive.google.com/?tab=wo&authuser=0#my-drive'. Blue arrows indicate the mapping between local folders and Drive items:

Application Specific Passwords . . .

Application-specific passwords

Some applications that work outside a browser aren't yet compatible with 2-step verification and cannot ask for verification codes, for example:

- Email programs including Outlook, Apple Mail, or Thunderbird

To use these applications, you first need to **generate an application-specific password**. Next, **enter** that in the password field of your application instead of your regular password. You can create a new application-specific password for each application that needs one. [Learn more](#)
